Autumn 2024

We are proud to present

≡SNOR≡ DE LUXE

Creating beautiful coffee table books at a great price is what we aim to do with our new imprint, Snor de Luxe. Take a look, here's our sophisticated and luxurious Snor!

We started with *Slow Living*: a stunning book about finding peace and stillness in your life. Eva Krebbers traveled all over the Netherlands, Belgium, and even Ireland to take the most beautiful photos for this book. We embroidered the cover to make it look like real embroidery (how we did it is our secret... err, Snor's secret) and used super deluxe matte paper (FSC certified and printed with natural inks).

Next, we made a book about grief that is not only optimistic in tone but also beautifully designed. We worked tirelessly on this cover too, using linen, gold foil, and creating a true piece of art (if we do say so ourselves). Author Marieke Noordanus took her scrapbook of inspiring quotes and wrote her own deeply moving story. It's the kind of book you'll proudly display on your finest shelf, providing comfort whenever you need it.

And the latest in the Snor de Luxe series: *Holy Happy Hormones*. Finally, finally, we got to work with Dana van Leeuwen again! We were so thrilled, as we're true fans of this incredible photographer. Copper foil on the cover, bam! Author and Ayurvedic therapist Bianca Fabrie, after writing three Ayurvedic books, feels like our sister now, especially as she shares recipes to tackle menopause hormones. We'll beat them all!

As you can see, we are absolutely delighted with our new Snor de Luxe! We hope you are too. Together, let's bring a new spirit to, with, and through Snor!

Eva says, “Many readers started working with the tutorials full of inspiration and discovered how soothing and relaxing it is to create something with your own hands.” This enthusiasm was contagious and inspired Eva to create a second volume: Slower Living. This standalone sequel focuses more on outdoor living. Hiking, wild camping, spoon carving, mushroom foraging, forest bathing. You get a behind-the-scenes look at creative makers like Yvette van Boven (culinary), Jennita Jansen from Plukatelier (floral), and witch Lunadea (magic) with beautiful photography, captivating interviews, and a wealth of practical tutorials.

AUTHOR MARIEKE NOORDANUS:
“After the death of my daughter, I went (online) in search of comfort. I sought light, love, reassurance, solace, and gentleness. A different perspective on that heavy grief and death. Inspiration for finding hope again. And practical tools – what can you do? La Vie en Rose was born out of that need. Under the motto: ‘Be the change you want to see in the world’, I have collected a treasure trove of insights, wisdom, exercises, quotes, books, songs, and poems over the past 10 years. That were gentle, light, inspiring, loving, and/or comforting. All the insights helped me build a new life. It is a toolkit that you can browse randomly – like a box of chocolates you can choose from.”

You’re not alone; your cells contain the universe. We’ve got to live, no matter how many skies have fallen. Life is going forth, death is returning home.

... these are examples of quotes that helped author Marieke Noordanus after the death of her daughter. She has compiled everything that brought light, comfort, hope, and beauty after this great loss into this book. With quotes from Bowie to Buddha, readers can find what they need at any given moment: insights that offer a different perspective on death, tools to help live each day, and music to slow down for a moment.

Marieke, who started a new career as a DJ a year after her daughter’s passing, says: La Vie en Rose is beautifully explained in the serie Landscapers on HBO as: To look up at the stars, instead of in the gutter. To see the beauty in life, even when it is difficult to find. Perhaps even when it is not there.

SUSTAINABLE CALENDAR

A green life step by step

Sustainable living difficult? Not if you take the small steps outlined in this calendar. All small steps together can make a big difference. This perpetual calendar provides simple achievable steps for your daily routine week by week. And – extra handy – you can keep track of your own ecological footprint.

For example, write down in January how often you took the bike instead of the car, in February how many garbage bags you produced, and try to improve this score next year. This allows you to continue to challenge yourself year after year to live a step more sustainably.

Without year, so can be used endlessly
